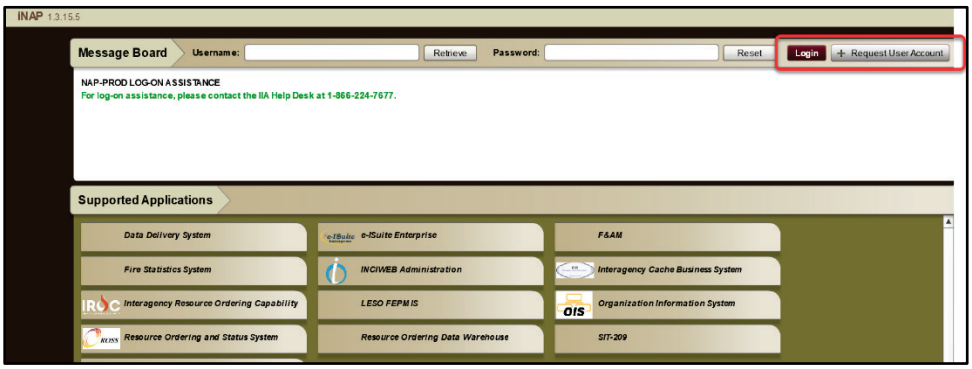
Accessing the Resource Ordering Data Warehouse

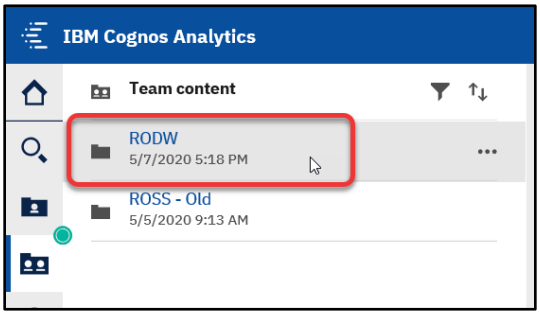
Dispatch managers can obtain access to the Resource Ordering Data Warehouse / Cognos reporting application to create and run reports using historical ROSS data. Users must login with a NAP account to access Cognos.

1 If you require a NAP account, browse to https://nap.nwcg.gov/NAP/# using Internet Explorer and click **Request User Account**. Request access to **RODW** (Standard Account).

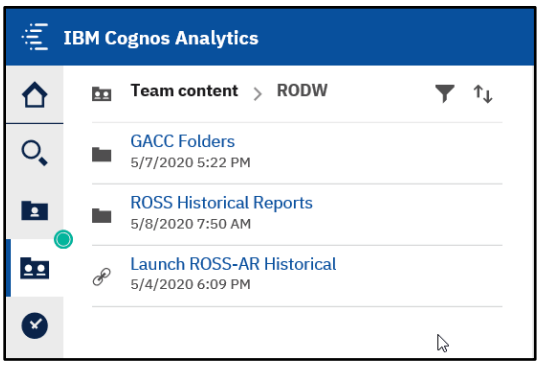


2 After you have access, use your NAP login to access the RODW at https://rodw.nwcg.gov.
Cognos may display best using Internet Explorer.

3 After authenticating to RODW, select the **Team Folder** from the menu on the left of the screen.



4 In the Team content folder, search for reports to access ROSS data for analysis and reporting.



Note: Cognos uses historical data exported from ROSS. Some legacy reports created when using ROSS may not function properly.
