

## ICBS Business Release Notes Post BR 1.3.0.8 06/10/2013

**A post BR 1.3.0.8 deployment was completed on June 9, 2013 to correct two problems encountered after the 1.3.0.8 deployment on May 22, 2013 and to implement one new CR (change request).**

### **Return Processing**

**Production Issue 928** – Users were receiving an error message ‘Null Pointer Exception’ when processing returns. This error was caused when there were blank lines on the return screen when the return was processed. The problem has been corrected now.

### **Refurbishment Processing**

**Production Issue 930** – Some users were reporting when they processed a refurbishment workorder an error message ‘YFS: Invalid Number’ was being shown but if they closed the error message the transaction was processed successfully. This has been corrected.

### **Loftware Reporting**

**CR 917 – Issue/Transfer Reports with hazardous items.** As of January 1, 2013 the old format of Proper Shipping Name, Hazard Class, Identification Number, Packing Group was no longer valid.

The new required format is: Identification Number, Proper Shipping Name, Hazard Class, and Packing Group, Weight.

- Old Example: Flammable solid, inorganic, n.o.s. 4.1 UN3178 III 0.81 (NFES 0299)
- New Example: UN3178 Flammable solid, inorganic, n.o.s. 4.1 III 0.81 (NFES 0299)

The format has been changed for all issue/transfer reports.
