INCIDENT ACTION PLAN (IAP)

General	Do not try to add data to a Blank Line (created from the Add Blank Line Button) in a form.						
ICS 202	When using bullets, if the text content wraps, it will not indent to the right of the bullet. This is an application issue that cannot be resolved.						
ICS 203	Use the Add Blank Line feature to adjust breaks in block content from column to column. Add the blank lines to the section which will be the last one in a column. Example: If in Planning and the column break at the bottom of the page is to end with Planning, add blank lines to Planning to push Logistics to the top of the next column.						
ICS 204	Block 5 Resources Assigned: A single OH resource will have a ResourceID of ItemCode:Name:Req#. When clicking on the Re-Order Resources button, the popup window only shows the ResourceID field. "Cutting" the OH name from the ResourceID and pasting it in the Leader Name field for better visual effect, causes the OH name to not appear in the popup, only the Item Code and Req# do. A Leader Name column will be added to the popup in a future release of the app.						
	<p>Block 4 Operations Personnel: The field fill order on the form for Block 4 is from left to right, not top to bottom. When using the Re-Order Positions function, the fill order is as follows in the popup window:</p> <table border="1" style="margin-left: 20px;"> <tr> <td>1st position in re-order</td> <td>2nd position in re-order</td> </tr> <tr> <td>3rd position in re-order</td> <td>4th position in re-order</td> </tr> <tr> <td>5th position in re-order</td> <td>6th position in re-order</td> </tr> </table> <p>If a position field is blank, click Add Blank Line in order to adjust for the vacant field and maintain the order desired.</p>	1st position in re-order	2nd position in re-order	3rd position in re-order	4th position in re-order	5th position in re-order	6th position in re-order
1st position in re-order	2nd position in re-order						
3rd position in re-order	4th position in re-order						
5th position in re-order	6th position in re-order						
	Blocks 6 and 7: When using bullets, if the text content wraps, it will not indent to the right of the bullet. This is an application issue that cannot be resolved.						
ICS 205	Each page has space for 16 rows of single line frequencies.						
Master Freq	Do not use the Add Blank Line feature in the Master Freq List.						
ICS 206	Clicking on the Add Blank Line button will add a blank "section" to the tab being used. It does not add a single blank line as in a regular document. Example: Adding a blank line to the tab Hospitals, will add an entire blank section with all the hospital fields blank.						
ICS 220	Page 1 of the form is static meaning the page will not expand or contract. The amount of grid data in Blocks 10 and 12 will expand and collapse page 2 and if there is one a page 3.
