

e-ISuite 1.2.1 Release Notes

Date: July 18, 2016
Version: e-ISuite Version 1.2.1

Description: The primary focus of this release is to address several known issues in the Training Specialist Module and to address two critical Cost defects.

Additional information is also available on the e-ISuite Webpage:

<http://famit.nwcg.gov/applications/eisuite>

Important Things to Know Prior to Installing e-ISuite Site Version 1.2.1

- **YOU MUST UNINSTALL** all previous versions of e-ISuite Site.
Note: See detailed uninstall instructions on the following page
- System Requirements
 - Windows 7 Professional or Windows 2008/2012 Server
Will install and run on Windows XP and Windows 10, but is not an officially supported operating system
 - No competing http Services (Tomcat6 will provide web services on server machine)
 - Must have Visual C++ 2010 Runtime Redistributable installed
- Browser Requirements
 - Internet Explorer 11 Officially Supported
 - Pop-up Blockers Turned Off
 - Latest Adobe Flash Installed
- System Administrative privileges **are** required to install the application.
Note: To install, download the file and right-click on the installer file and choose either Run as Administrator or Run Elevated (USFS).
- For more information Download the Site Installation and e-ISuite Site Setup Basics PowerPoints located on the Helpful Resources page.
<http://famit.nwcg.gov/applications/eISuite/support/resources>
- See the Site e-ISuite Account Manager User Guide for additional information on establishing user accounts in Site and assigning roles and access to incidents.
http://famit.nwcg.gov/sites/default/files/AccountManager_UserGuide.pdf
- An Online Tutorial for the Site Account Manager is also available on the e-ISuite Webpage under Online Tutorials.

e-ISuite Site Version 1.2.1 Installation Instructions When Previous Version is Installed

Step 1: Copy all the files in the NWCG-BACKUPS folder from C:\ProgramData\e-ISuite to another location such as a USB Drive or External Hard Drive. By default, e-ISuite backups are stored in the following directory: C:\ProgramData\e-ISuite\NWCG-Backups

Note: Users should copy everything in that directory to a different location (either an external hard drive, a USB drive, or another location on their machine)

Step 2: Uninstall their current version of e-ISuite. The safest way to uninstall e-ISuite is to use the e-ISuite uninstaller in the start menu under Start Menu > All Programs > e-ISuite. Users must run that uninstaller by right-clicking on Uninstall e-ISuite Site and picking either Run Elevated (USFS Users) or Run As Administrator (all other users).

Step 3: Users will be required to reboot their systems after they uninstall e-ISuite.

Steps 4 is Recommended, but not Required

Step 4: After the system reboots, users need to delete the e-ISuite folder from the C:\ProgramData folder.

Note: The C:\ProgramData folder may not be visible if users have their folder settings set to not show hidden files and folders. If it is not visible, users can temporarily change their Folder Settings to show hidden files and folders under the Control Panel > Appearance and Personalization > Folder Options)

Step 5: After deleting the e-ISuite folder from C:\ProgramData, users may proceed with the installation of e-ISuite Site 1.2.1.

Release 1.2.1 Summary
