<u>**NAP Version 1.3.10 Release Notes**</u>

This is a synopsis of the new and corrected functionality included in NAP version 1.3.10. The primary objective for this release is to improve the flow for requesting and approving contractor accounts.

Installation

No user action is required.

New or Changed Functionality

- The screen flow for requesting a user account has been modified to make it easier when requesting a contractor account, and to allow data to be gathered from the new user to allow the account to be automatically added in ROSS.
- Email notifications are now sent when the status of a user account becomes Removed or Disabled.
- The URL for the Help Desk that is included in the Password Expired e-mail notification has been updated.

Reports Changes

- None

Additional Change Requests and Defects Fixed in this Version

- None.
