ICBS Business Release Notes
BR 1.4.8
11/14/2017

BR 1.4.8 is scheduled to be deployed into production on 11/14/2017

Change Request/Bug Fixes

Below are the changes that are scheduled to be implemented in this release. There are a total of 6 change requests in this release.

ICBS-ROSS Interface Changes:

1. **CR 2589 - ICBS BR 1.4.8 - ICBS-ROSS Update Incident to a Merge Child**
    ICBS must prevent the ordering on incident when an incident becomes a Merge Child and allow the user to ordering on incident when an incident is no longer merge child.
    With this change, we prevent the user from ordering on incident when it is a merge child.

2. **CR 2588 - ICBS BR 1.4.8 - ICBS-ROSS Incident Numbering to Comply with NWCG Standard.**
    Incident Host Next Sequence Number must be changed to accommodate the NWCG data standard, which are longer and allow alphas, hyphens and periods.
    With this change, we update the sequence number to comply with NWCG data standards.

3. **CR 2587 - ICBS BR 1.4.8 - ICBS-ROSS UpdateShippingStatusNotificationReq for ItemsCancelled field.**
    ICBS is sending more than 194 characters for ItemsCancelled field, which is not being accepted by ROSS as we have setup the character length as 194.
    With this change, we are trimming the data when the ItemsCancelled column exceeds 194 characters and send the data to the ROSS.

Cognos:

1. **CR 2617 - ICBS BR 1.4.8 - IDCDK Trackable Item Loc Report Glitch**
    Trackable Item Location Report is showing a list of trackable properties in the inventory based on its status. But based on the user's requirement, no need to show all the statues that are adjusted from the inventory with statues like ('L','U','X' and 'O').
     With this change, the status (('L','U','X' and 'O') will not show up on the report.

2. **CR 2618 - ICBS BR 1.4.8 - NWCG Report - wrong date format.**

NISCC Enterprise Account Transaction report is showing up the wrong date format i.e.(DD/MM/YYYY).
With this change, the date format will be displayed as (MM/DD/YYYY) only.

3. **CR 2615 - ICBS BR 1.4.8 - ORLGK: WMS Incident Summary Loss Use Report.**
Incident summary and Loss Use Report is giving the credit for UNS returned items. Based on the requirement these reports should not give credit for UNS returned items.
With this change, UNS will not be calculated while calculating "cost outstanding" in the report.
