

**ICBS Business Release Notes
BR 1.3.0
12/03/2010**

BR 1.3.0 will be deployed into production on 12/07/2010

ROSS-ICBS Phase 2 will deploy the interface between ROSS and the ICBS application to exchange data on incidents, requests and issues. Requests for cache items can be created in ROSS and placed to ICBS at the appropriate cache via the interface. ICBS will update status of requests and other issue information via the interface to ROSS. ICBS initiated issues will send request fill information to ROSS along with other issue information. National tracked items i.e. NIRSC radios, AKK radios, RAWs etc will be tracked in both systems and updated accordingly.

Training and orientation sessions are scheduled for the ICBS users the week of December 1, 2010. The PowerPoint presentation used for these sessions is available on the ICBS page at www.icbs.nwccg.gov under the ICBS-r Training link. Other reference documents and Quick Reference Guides are being developed for publication in the near future.
