

ICBS Business Release Notes BR 1.3.0 Hot Fix 01/11/2011

A Hot Fix for BR 1.3.0 is scheduled for deployment into production on 1/11/2011

Overview

This hot fix includes two components:

1. A change to a property file required for key ICBS application functions to work after Java version 1.6 build 23 (JRE 1.6.0.23) is deployed by the FS on 1/10/2011
 - a. Customer_Overrides.properties
 - i. `yfs.yfs.config.java.plugin.codebase=http://java.sun.com/update/1.6.0/jinstall-6u23-windows-i586.cab`
2. An application "hot fix" to correct a problem with Catalog Update. The NFES Item update is throwing an exception and it is fixed in the "hot fix".
