NAP Version 1.1/OIS Version 1.1 Release Notes

This is a synopsis of the changes included in the deployment of NAP 1.l and OIS 1.1 which will occur as a combined deployment.   The primary objective of NAP version 1.1 is to implement internal security changes and include additional required Privacy Policy text.   The primary objective of OIS version 1.1 is to resolve issues with email addresses and miscellaneous data fixes.

Installation
No user actions required.

New or Changed Functionality
None.

Change Requests and Defects Fixed in this Version

- **NAP**
    - Internal security and reporting database changes.   No visible change for user.
    - Correction of incorrect browser title to "NAP – NESS Application Portal."
    - Addition of required Privacy Policy text.

- **OIS**
    - Internal performance related fixes and typo corrections on screens.
    - Fixed discrepancy in upper and lower case in Reports.
    - Modified email requirements to allow for numeric character at beginning of email address and other special character issues.
    - Added corrective feature to save Unit Identifier in uppercase in database, regardless of user entered case.
