

# **NAP Version 1.3/OIS Version 1.3 Release Notes**

This is a synopsis of the changes included in the deployment of NAP 1.3 and OIS 1.3 which will occur as a combined deployment. The primary objective of both NAP version 1.3 and OIS version 1.3 is to provide Analytical Reports for Administrators and to add minor functionality and fix miscellaneous defects.

## **Installation**

No user actions required.

## **New or Changed Functionality**

- **NAP**
  - Added NAP URL to all NAP generated emails, including password expiration reminders.
  - Implement Cognos authentication and services functionality.
- **OIS**
  - Added Reference Data management for Office Type
  - Added merge, unmerge, decommission, re-commission and delete Subdivision functionality.
  - Implement Cognos authentication and services functionality.

## **Change Requests and Defects Fixed in this Version**

- **NAP**
  - Prevent a new account request if user already has existing NAP account.
  - Added Verification Contact information when adding application.
  - Added requirement to acknowledge Rules of Behavior (rules can no longer be deferred).
  - Updated Administrator reports to add data.
  - Include Active status on User Account Status Audit report and corrected download error when no data in a section.
- **OIS**
  - Improved search prompts for reports generated by Administrators.
  - Corrected incorrect display of subdivision for empty structures.
