

RELEASE NOTES

Requests:

- IROC will now allow NFES requests that were filled locally (not filled by ICBS) to be unfilled by the filling dispatch.
- Users can now “Cancel Fill w/ TFR” once they start the fill process. Previously users didn’t have the “Cancel Fill w/ TFR” option.
- Resolved behind the scenes messaging between IROC/ICBS when Radio Kits get reassigned from Prepo to Wildfire.

Resources:

- Fixed issue where users could not set resource Home Unit appropriately. Previously this was limited to the Provider and it’s children. Now users can set the Home Unit to any Local Dispatch, NICC, GACC or Government (Non-Dispatch) organization if the resource is government owned. If a resource is vendor owned, the Home Unit will automatically set (Read Only) to the Vendor organization.

IROC Training Instance Scheduling:

- Please contact Cheryl Dickson, IROC Training SME, at cheryl.dickson@usda.gov to reserve an IROC Training Instance.
- Requests to reserve a Training Instance should be made 2 weeks (at a minimum) prior to training. Requests within 2 weeks may not be guaranteed.
- The current IROC Training Calendar is posted to the IROC website at <https://famit.nwcg.gov/node/2530>. The calendar will be updated regularly.
