

**This KM explains where to find information about the cache standards for Location Number.**

### **End User Solution**

Correct location numbering in a cache is crucial for ICBS to behave correctly.

The ICBS-R Training Power Point Presentation (PPT) used for teaching users on zones and locations is posted on the ICBS-R Project website (Slide 5 specifically addresses location numbering.) available at:

[http://icbs.nwcg.gov/Traininig/ppts/04\\_NWCG\\_Defining%20the%20Warehouse%20Layout.ppt](http://icbs.nwcg.gov/Traininig/ppts/04_NWCG_Defining%20the%20Warehouse%20Layout.ppt).

An additional reference is the "Locations Numbering Aid" PPT, which is found on the ICBS-R Project website at <http://icbs.nwcg.gov/Implementation.html>.

These presentations are attached to this Answer ID respectively.
