This KM explains the ICBS console system requirements.

End User Solution

To see ICBS system requirements, go to:
http://icbs.nwcg.gov/Documentation/ICBS_Hardware_and_Software_Requirements_201 1_1206.pdf.

ICBS is a web-based application and is only dependent on the computer's ability to maintain a **network connection** and run **Internet Explorer**. End-users are advised not to use Mozilla Firefox, Google Chrome or other third party web browsers as they yield unpredictable interface issues.

However, for all kitting and de-kitting processes the standard Forest Service Java version is required and it must be enabled in **Tools** --> **Manage Add-ons...** (on the browser menu).

The ICBS NAP login page is located at https://nap.nwcg.gov/NAP/.
