

This KM explains how to obtain the Azalea barcode catalog.

End User Solution

The ICBS-R barcode catalog is available in Excel or PDF format. A plugin is required to view the barcodes on the Excel spreadsheet. This plugin must be installed on the machine on order for the bar codes to display properly. If you are unable to install the software (plugins) on your PC, a PDF version of the catalog has been made available.

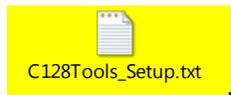

Download the files attached at the bottom of this answer and follow the directions in the document titled BarcodeInExcel Azalea Instructions 2008_0516.doc to obtain a copy of the Azalea barcode catalog.

The following files are attached to this answer:

- BarcodeInExcel Azalea Instructions 2008_0516.doc
- C128Tools_Setup.exe (plug in file)
- Catalog_050912.xlsx
- Catalog_050912.pdf

NOTE: The word document (.doc) attached includes instructions on how to download and install the Code 128 Plug-in. Please disregard this portion of the instructions as these steps are included in the executable installation file.

File Attachment:

Comment [UFS1]: Not 508 compatible and I can't open these.
