

Wildland Fire Management Information (WFMI) Weather - Lesson 1: Access

Do I have access to WFMI weather?

To request access to WFMI Weather module, go to the [WFMI](#) main web page:

- Select Access Request link
- Read General Rules and Guidelines Governing the Use of Bureau of Land Management Computer Systems link
- Select WFMI Weather-Maintenance User Access Request Form link

To request view access only, complete section I, sign section II and either scan and email or fax to number on form.

To request edit access to one or more Remote Automated Weather Stations (RAWS), complete section I, II, and III. If you need edit access for only one or a few stations or portables, list them in section III; otherwise, *leave blank* if you need access to all RAWS within your unit.

For federal government, have your Regional RAWS Coordinator sign section IV and they will forward to Agency Representative.

State/local government cooperators do not need a signature in section IV unless a Regional (State) coordinator has been designated; fax or email the form to USFS Agency Representative.

Once Agency Representative has signed, edit access will be established.
