

Setting Resource Availability Area

Dispatchers can set the resource availability area for one or more resources.

- 1 In IROC Portal, select the appropriate dispatch center from the **Dispatch** content selector.
- 2 Click the **Resources** bar on the Resources action tile to open the Resources work area on the bottom portion of your screen.

- 3 Click the checkbox in the **Selected** column to choose one or more resources.
- 4 Click one of the following **Availability** action buttons: **Local**, **State**, **GACC**, or **National**.

Note: In ROSS, *availability area* was referred to as *selection area*.
