## Description

The Search for Resources module allows users to search for aircraft, crew, equipment, overhead resources, and tracked supply resources by providing a resource name. Screen access is from the 'Resource' option on the menu bar.

Wildcard searches are permitted by placing an asterisk (\*) before and/or after a name. Users may narrow their search by providing the resource's home dispatch, provider and/or current dispatch. The search results include all resources that meet the criteria. Users can search for resources even if they are not managed by their dispatch center and are not assigned to one of their incidents.

# ROSS Module Summary

## Search For Resources

The Search for Resources module is related to the Request Status, Resource Status, and Incident Resources modules.

### Data Information

Data Element	Data Definition
Last Name, First Name	The name of an overhead resource. <i>Last name is a required field.</i>
Resource Name	The name or call sign of an individual resource item, such as ENGINE – 42.
Catalog	A list of resource items grouped by aircraft, crews, equipment, overhead, and tracked supply resources.
Category	A grouping of catalog items within a catalog, such as Fixed Wing (Category) for Aircraft (Catalog)
Item Name	A standard name that identifies the basic nature of a catalog item. For example, Engine, Type 6 and Airtanker, Type 1 are catalog Item short names.
Item Code	A four-letter code associated to the Item Short Name. For example, ENGB is the Item Code for the Catalog Item ENGINE BOSS.
Home Dispatch	A two-letter state postal code followed by a three- or four-letter identifier. The dispatch center having the primary responsibility of maintaining information about a resource and the authority to initially assign it to an incident.
Current Dispatch	A two-letter state postal code followed by a three- or four-letter identifier. A resource's current dispatch center location. For example, when at home, the resource's current dispatch is the home dispatch. When on an incident, the resource's current dispatch is the dispatch unit responsible for the incident.
Home GACC	A two-letter state postal code followed by a three- or four-letter identifier. The physical location of an interagency, regional operation center for the resource's home dispatch center.

## Search For Resources

Data Element	Data Definition
Current GACC	A two-letter state postal code followed by a three- or four-letter identifier. The physical location of an interagency, regional operation center for the resource's current dispatch center.
Provider	The organization responsible for a given resource item, which may or may not be the resource item's owner.
Home Unit	The physical location of a resource, such as an office, organization, or jurisdiction. For example, a home unit may be a BLM district, a municipal fire station, or a USFS ranger station.
Provider Agency	The name of the government entity associated with the provider.
Vendor	The name of the private, for-profit company that has a contract with a government (non-dispatch organization), which owns the resource.
Contract #	The contract number associated to the vendor that owns the resource.
Incident Name	Name of the incident.
Incident #	A unique identifier given to an incident, consisting of the Incident Host Unit ID and a six-digit sequential number.
