ROSS Version 2.16.15 Release Notes

This is a synopsis of the new and corrected functionality included in ROSS version 2.16.15. The primary objective for this release is to upgrade the ROSS database and to fix some reports issues.

Installation

No user action is needed.

Reports Changes

- A description has been provided for the Contract query subject.
- The drill-through links have been updated for the following reports:
    - RAS-501 Requests Filled with Non-Government Resources
    - RAS-502 Contract and AD Resource Assignment History
- Sample output is now hidden by default, so that report prompts are visible.

Defects Fixed in this Version

- None.

Additional Changes

- The ROSS database has been upgraded from Oracle 11g to 12c.
- The Cognos content store database has been migrated from Oracle 11g to Microsoft SQL Server.
