

VIPR to ROSS Interface

Virtual Incident PRocurement (VIPR) is a web-based Forest Service application that allows vendors to find solicitations that match their resources, submit quotes on solicitations and amendments, and update their company and resource information. The VIPR to ROSS interface allows pertinent information about vendor-owned resources to be shared electronically, to reduce errors and increase the efficiency of dispatching those resources in ROSS.

The VIPR to ROSS Interface may be deployed as early as June, 2015. Prior to deployment, all contracts and contracted resources entered into ROSS must be reviewed. To ensure a clean transition, each Dispatch Center must review their resource items and complete any required data cleanup activities.

Cleaning up your contracts and contracted resources in ROSS

Because VIPR and ROSS can now share data, it is important to first clean up the existing contracts and contracted resources currently stored in ROSS. To do this, you need to perform the following:

- Print out your Dispatch Priority List (DPL)
- Clean up the contracts related to your dispatch center
- Clean up the resources dispatched by your dispatch center.

The tasks outlined in this document are intended as a guide. Always refer to your Regional Standard Operating Guides/Procedures for specific regional or local direction.

[See, "Contract – setting up agreements."](#)

Print out your DPL

Your DPL identifies all the information you need to clean up the contracts and contracted resources associated with your dispatch center.

Clean up the contracts related to your dispatch center

To complete the tasks in this section you'll need to:

- Log in to ROSS
- Open the Contract screen
- Keep your DPL handy.

To remove your dispatch center's expired VIPR contracts

1. In **ROSS**, open the **Contract** screen.
2. For each **Contract Number** with **Type = CWN**, perform the following
 - a. Verify which **Contract Numbers** are **VIPR contracts**.
 - b. Compare the (VIPR) **Contract Number** displayed on the **Contract** screen to what is listed on your **DPL**.
 - c. If **Entered By = Your Dispatch Center**, click the **Remove Contract** button.

To remove your resources from expired contracts from other Entered By dispatch centers

1. On the **Contract** screen, for each **Contract Number** with **Type = CWN**, perform the following
 - a. Compare the **Contract Number** displayed on the **Contract** screen to what is listed on your **DPL**.
 - b. In the **Entered By (your dispatch center)**, click to select the **Resource Name**, and then click the **Remove Resource(s)** button.

To select more than one resource at a time, press and hold [Ctrl], and then highlight all Resource Names of your choice.

To remove a contract from other Entered By dispatch office

1. On the **Contract** screen, for each **Entered By \neq Your Dispatch Center**, contact the dispatch center listed in the **Entered By** column.
2. Ask them to remove the contract (put the expired contract into the trash). *This will remove it from your Contracts screen.*

To create a contract that is not already in ROSS

1. On the **Contract** screen, click the **New** button.
2. On the **New Contract** dialog box, type the **Contract Number** in the **Contract Number** text box.
3. Click the **Calendar** button, and then click to select the **Begin Date** and **End Date** for the contract.
4. Click the **Pick** button next to the **Vendor/Government Non Dispatch**.
5. On the **Search Vendors** dialog box, search for and then click to select the **Vendor Name associated to your contract**, and then click **OK**.
6. On the **New Contract** dialog box, click **OK**.

Example 1, "Contract screen," highlights relevant information in the Type column, the Entered By column, and the resources attached to the contract as shown on the Resources tab.

The screenshot shows the ROSS interface for contract [CA-KNF-005956] Happy Camp Complex. The 'Contracts' table is as follows:

Contract Number	Type	Begin Date	End Date	Global Access	Vendor / Government (Non-Dispatch) Provider	Entered By
AG-024B-C-14-9029	EXU	05/01/2014	04/30/2018	No	Heliqwest International, Inc.	ID-NIC
AG-9J61-B-14-7364	CWN			No	Mike Peters Enterprises	CA-YICC
AG-9J61-B-08-7081	CWN			No	Scott Valley Fallers	CA-YICC
AG-9J61-B-08-7089	CWN			No	North Zone Fallers	CA-YICC
AG-9J61-B-08-7107	CWN			No	G M Felling	CA-YICC
AG-9J61-B-09-7193	CWN	06/26/2009	06/26/2012	No	Expeditors by Lindale, Inc.	CA-CCCC
AG-9J61-B-09-7402	CWN			No	Salmon Mountain Forestry LLC	CA-YICC
AG-9J61-B-09-7456	CWN			No	Earl P. Bryant	CA-YICC
AG-9J61-B-09-7458	CWN			No	Terry L. Wolfe	CA-YICC
AG-9J61-B-09-7460	CWN			No	Robert Will	CA-YICC
AG-9J61-B-09-7464	CWN			No	John Koczan	CA-YICC

The 'Resources on Contract' table is as follows:

Resource Name	Home	Provider Unit	Alternate Name	Operator
FALLER - SINGLE - Robert Griggs - Scott Valley Fallers	CA-YICC	CA-KNF	FALLER - SINGLE - Robert Griggs - Scott V...	Not Appli
FALLER - SINGLE - Tom Gephart - Scott Valley Fallers	CA-YICC	CA-KNF	FALLER - SINGLE - Tom Gephart - Scott Val...	Not Appli
MODULE - FALLER - SCOTT VALLEY FALLERS	CA-YICC	CA-KNF	MODULE - FALLER - SCOTT VALLEY FALL...	Not Appli

Example 1. Contract screen

In this example, the Contract Number identifies "08," which indicates the year the contract was created, is therefore most likely expired.

When reviewing your current DPL for "FALLER – SINGLE" and "MODULE – FALLER," check to see if these resources are on the current DPL under the same contract number. If not, and your dispatch center is listed in the Entered By column, you can put that contract in the trash. This will remove the resources from the contract. The resources are still available from the Resource Item screen, and must be evaluated prior to implementation of the VIPR to ROSS interface.

[See, "Clean up the resources dispatched by your dispatch center."](#)

Remember, these "removed" resources will still display on the Resource Item screen and must be evaluated later.

Example 2, "Expired contract," is an example of an expired contract entered by CA-YICC with a contract Entered By CA-SIFC and an End Date of 04/01/2013. Because CA-SIFC

entered the contract originally, the Remove Contract button (the trash can) is grayed out (unavailable). Therefore, CA-YICC cannot remove that contract.

However, CA-YICC can remove resources from that contract, where Home=CA-YICC, by highlighting those resources and clicking the Remove Resource(s) button.

Remember, these “removed” resources will still display on the Resource Item screen and must be evaluated later.

The screenshot shows the ROSS application window with the following data:

Contracts - (Resource Privileges Only)

Example 2. Expired contract

To remove the contract from your Contract screen

1. Contact the dispatch center listed in the Entered By column.
2. Ask them to remove the contract (put the expired contract into the trash).

Example 3, “Entered By dispatch center,” shows the Contracts screen for CA-SIFC and the organizations related to the contract and to its resources.

Example 3. Entered By dispatch center

Clean up the resources dispatched by your dispatch center

To complete the tasks in this section you'll need to

- Log in to ROSS
- Open the Resource Item screen
- Keep your DPL handy.

To remove resources in ROSS that are not listed on your DPL

1. In ROSS, open the Resource Item screen, and click the **Equipment** option button.
2. Look for contracted equipment where the **Provider = Forest Service** organization.

For example, "CA-KNF" and "OR-R06" are both Forest Service organizations.

3. Review the Current Dispatch column.

Current Dispatch = NONE (CWN/Agreement) denotes a resource attached to a contract. Current Dispatch = Dispatch Center ID denotes a resource not attached to a contract.

- 4. Compare the contracted resources on the Resource Item screen to what is listed on your DPL.**
- 5. If the resource is no longer on a current contract, click to select the Name, and then click the Remove Resource(s) button.**

To verify all contracted equipment resources have a VIN or Serial Number

- 1. On the Resource Item screen, scroll down the entire list of Equipment.**
- 2. For each Name with Current Dispatch = NONE (CWN/Agreement), perform the following:**
 - a. Click to select the **Name**.
 - b. Review the **VIN** and the **Serial Number** fields.
 - c. If blank, type the **VIN** and **Year Manufactured**, or **Serial Number** in the appropriate text boxes, and then click the **Save** button.

Enter the Numbers/characters of the VIN or Serial Number. For example, enter "X59349." Do not enter "VIN X59349."

Your DPL does not identify the Year Manufactured. However, if you don't know the Year Manufactured, enter the VIN into the Serial Number text box. During the initial interface connection, ROSS will pull information from VIPR and will be able to compare both VIN and Serial Number fields with the manually entered resource to find a match.

- d. If the **Resource Item Name** does not identify (at least) the last six numbers of the **VIN** or **Serial Number**, add it to the end of the **Name**.
- e. Click the **Save** button.

Example 4, "Resource Item screen," highlights relevant information in the Name column, Provider column, the Current Dispatch column, and the VIN, Year Manufactured, and Serial Number fields. Note the naming convention used for a Type 2 Dozer. While the last six numbers of the VIN number are listed at the end of the resource name, it must also be entered into the VIN text box.

Example 4. Resource Item screen

To verify naming convention and complete Unique ID for all Faller Modules and Single Fallers

1. On the Resource Item screen, click the Overhead option button.
2. Scroll down the list of **Faller Modules** and **Single Fallers**.
3. Review your **Dispatch Priority List (DPL)** for **Faller Modules** and **Single Fallers**.
4. For each **Faller Module** and **Single Faller**, perform the following:
 - a. Click to select the **Name**.
 - b. Note the **Unique ID** in the last column of your DPL.
 - c. Verify and correct all **Names** using the following naming conventions

FALLER – SINGLE - <Vendor Name> - <Complete Unique ID>

MODULE – FALLER - <Vendor Name> - <Complete Unique ID>

d. Click the **Save** button.

You must enter the complete Unique ID for Faller Modules and Single Fallers so that VIPR can search for a match when VIPR resources are downloaded. If the entire name is longer than 93 characters, shorten the vendor name.

Example 5, “Faller Module Type 1,” shows an excerpt of a DPL listing for CA-YICC. The VIN/Unique ID column is highlighted.

Example 6. Faller Modules and Single Fallers

To add equipment resources on your DPL to ROSS

When creating an Equipment resource item, DO NOT IDENTIFY IT AS A SERVICE. Follow the proper naming conventions and be sure to enter the Vendor as the Owner and as the Home Unit.

1. On the Resource Item screen, click Equipment, and then click the **New** button.
2. On the **ROSS Confirmation Message** dialog box, click **No**.
3. In the **Name** box, type the **Name** of the equipment.

Remember to use the proper naming convention! For example, DOZER – T2 – VENDOR NAME - <last six number of VIN> is a valid naming convention for a Type 2 Dozer.

4. To identify the equipment, perform one of the following
 - a. In the **VIN** text box, type the **Vehicle Identification Number**, and then type the **Year** in the **Year Manufactured** text box, or

- b. In the **Serial Number** text box, type the **Serial Number**.

Your DPL does not identify the Year Manufactured. However, if you don't know the Year Manufactured, enter the VIN into the Serial Number text box. During the initial interface connection, ROSS will pull information from VIPR and will be able to compare both VIN and Serial Number fields with the manually entered resource to find a match.

5. Click the **Pick Provider** button, click **Resource has single Provider**, search for and click to select the **Provider** of your choice, and then click **OK**.
6. To identify the equipment as a national resource, select the **National Resource** check box.
7. To save the equipment resource item, click **Save**.
8. Complete the **Resource Item** screen tabs as appropriate.

You must identify the Vendor Name as the Home Unit and as the Owner on the Organizations tab on the Resource Item screen.

To add FALLER resources on your DPL to ROSS

When creating a "MODULE – FALLER" or a "FALLER – SINGLE" be sure to create them as a GROUP.

1. On the Resource Item screen, click Overhead, and then click the **New** button.
2. On the **ROSS Confirmation Message** dialog box, click **Yes**.
3. Note the **Unique ID** in the last column of your **DPL**.
4. In the **Group Name** box, type the **Name** of the **Overhead Group** using the following naming convention
MODULE – FALLER - <Vendor Name> - <Complete Unique ID>
5. Click the **Pick Provider** button, click **Resource has single Provider**, search for and click to select the **Provider** of your choice, and then click **OK**.
6. Click the **Save** button.

To add resource items created by your dispatch office to your CWN contract

1. On the Contract screen, search for and click to select the **Contract** of your choice.
2. Click the **Resources** tab, and then click the **Add** button.
3. On the **Search Resources** dialog box, click to select either the **Search by Resource** or **Search by Catalog** tab.
4. Click to select the **Resource Items you want to add to your dispatch office's Contract**, click the **Apply** button, and then click the **Close** button.

5. On the **Information** dialog box, click **OK**.

If you don't see your new resource on the Resources tab on the Contract screen, go to the Resource Item screen and verify that the Vendor Name is identified as the Owner of that resource.

VIPR Catalog Items

Table 2, "VIPR Catalog Items," lists the Catalog Items for VIPR resources. The "VIPR Resource Stated in ROSS?" column identifies the following:

- Yes = The resource will be in ROSS.
- No = The resource is a service and will be a "Fill with Agreement" resource.
