e-ISuite 1.2.4 Release Notes

Date: April 26, 2018
Version: e-ISuite Version 1.2.4

Description: The primary focus of this release is to address several known issues and defects in Release 1.2.3.

Additional information is also available on the e-ISuite Webpage:

> http://famit.nwcg.gov/applications/eisuite

Important Things to Know Prior to Installing e-ISuite Site Version 1.2.4

- **YOU MUST UNINSTALL** all previous versions of e-ISuite Site.
  Note: See detailed uninstall instructions on the following page

- System Requirements
  - Windows 7 Professional, Windows 10 Professional, or Windows 2012 Server
  - No competing http Services (Tomcat6 will provide web services on server machine)

- Browser Requirements
  - Internet Explorer 11 Officially Supported
  - Google Chrome works well and should be tried if issues are encountered with Internet Explorer 11 or Edge in Windows 10
  - Pop-up Blockers Turned Off
  - Latest Adobe Flash Installed

- System Administrative privileges <u>are</u> required to install the application.
  Note: To install, download the file and right-click on the installer file and choose either Run as Administrator or Run Elevated (USFS).

- For more information Download the Site Installation and e-ISuite Site Setup Basics PowerPoints located on the Helpful Resources page.
  > http://famit.nwcg.gov/applications/eISuite/support/resources

- See the Site e-ISuite Account Manager User Guide for additional information on establishing user accounts in Site and assigning roles and access to incidents.
  > http://famit.nwcg.gov/sites/default/files/AccountManager_UserGuide.pdf

- An Online Tutorial for the Site Account Manager is also available on the e-ISuite Webpage under Online Tutorials.

e-ISuite Site Version 1.2.4 Installation Instructions
When Previous Version is Installed

Step 1: Copy all the files in the NWCG-BACKUPS folder from C:\ProgramData\e-ISuite to another location such as a USB Drive or External Hard Drive. By default, e-ISuite backups are stored in the following directory: C:\ProgramData\e-ISuite\NWCG-Backups
> *Note: Users should copy everything in that directory to a different location (either an external hard drive, a USB drive, or another location on their machine)*

Step 2: Uninstall their current version of e-ISuite. The safest way to uninstall e-ISuite is to use the e-ISuite uninstaller in the start menu under Start Menu > All Programs > e-ISuite. Users must run that uninstaller by right-clicking on Uninstall e-ISuite Site and picking either Run Elevated (USFS Users) or Run As Administrator (all other users).

> *Note: USFS users should go to the Start Menu>Powerbroker>Powerbroker – Uninstall or Change a Program. A list of programs that can be uninstalled or changed will be displayed and the user should then click on e-ISuite Site to select it and then click on Uninstall. Say Yes to the dialog asking if you are sure you want to uninstall e-ISuite Site and Site will be uninstalled correctly.*

Step 3: Users will be required to reboot their systems after they uninstall e-ISuite.
Steps 4 is Recommended, but not Required

Step 4: After the system reboots, users need to delete the e-ISuite folder from C:\ProgramData
> *Note 1: The C:\ProgramData folder may not be visible if users have their folder settings set to not show hidden files and folders. If it is not visible, users can temporarily change their Folder Settings to show hidden files and folders under the Control Panel > Appearance and Personalization >Folder Options).*

> *Note 2: In the future, when e-ISuite versions 1.2.4 and later are uninstalled, it will no longer be necessary to delete the e-ISuite folder from C:\ProgramData because the uninstaller will remove all the files that need to be removed and will leave the C:\ProgramData\e-Isuite\NWCG_BACKUPS folder on the system, thus ensuring that any database backups do not get deleted during an uninstall. In the future, Users should not remove the C:\ProgramData\e-Isuite\NWCG_BACKUPS folder because that contains all the database backups from previous installs.*

- **Step 5:** After deleting the e-ISuite folder from C:\ProgramData, users should clear their browser cache before installing e-ISuite Site 1.2.4. Instructions for clearing browser cache in the four most popular browsers can be found at the following link: [Clearing Browser Caches](#). Users may proceed with the installation of e-ISuite Site 1.2.4.

Release 1.2.4 Summary

Defect ID	Functional Area	Summary
5566	IRWIN	• IRWIN Functionality has been temporarily disabled and will be re-enabled at a later date. (Enterprise Only)
5493	Database Management	• All Backups (Manual and Automatic Backups and the backup created by the system when a database is removed from Site) now contain the correct IAP External Attachments and Financial Invoices for the database being backed up.
4557	Database Management	• Creating a New Database no longer results in a Cannot Open Session-Hibernate Error as long as the browser cache is cleared before trying to create a new database.
5492	Database Management	• The Uninstall process has been revised to eliminate the need for users to manually delete the e-ISuite folder from C:\Program Data\ after uninstalling.
5421	Cost Accruals and Custom Reports	• Resources entered on the Resource Other Cost tab in the Cost Module now are included in accrual reports and Custom Reports.
5517	Custom Reports	• A number of minor changes were made to field names in various Custom Report Views to bring greater consistency across the various Report Views.
5516	Custom Reports	• A number of new fields were added to almost all custom report views.
5336	Custom Reports	• All Date fields in Custom Reports now return only the date portion of the Date/Time fields used in the database and therefore all date fields will now work correctly when used in aggregate reports.
5552	Time Module	• OF-286 Adjustment page now totals correctly if adjustments go to two pages.
5351	Time Module	• The last invoice for an overhead resource when it is a parent record can now be deleted.
5158	Time Module	• Prompts have been added to caution users when changing Employment Types for Resources.
5444	Incidents	• The FED agency option has been removed from the Jurisdiction dropdown list on the ADD and EDIT Incident Screens.

Defect ID	Functional Area	Summary
5555	Financial Export	• Financial Exports no longer include cost accrual headers without incident data.
5319	Financial Export	• An issue where financial export data for the OF-286s were not matching data on invoices has been corrected.
5579	Time Module	• The street office address for the US Forest Service Admin Office for Payment has been updated.
5341	Cost Module	• Daily costs no longer continue to run after a release date is entered if status is not changed to demobed or reassigned.
5505	Cost Module	• Changing the cost group start date no longer duplicates cost group dates.
5310	Cost Module	• An issue with daily cost record creation affecting overhead costs and resources has been corrected.
5578	Time and Cost Module	• An issue where printing Time and/or Cost Reports resulted in a page 404 error has been corrected.
5560	IAP Module	• Users will no longer receive a null error when copying an ICS-204 form that has no branch defined.
5569	IAP Module	• The ICS-206 Medical Plan has been updated.
5570	IAP Module	• A confidentiality statement has been added to ICS Forms 204, 205, 206, and 220
5543	Plans Reports	• Explanatory Text has been added to the 209 Report Definition Screen
5465	Plans Reports	• 209 Report column heading "Dozers, Type 1" has been changed to Dozers.
5498	Plans Reports	• The rules for calculating people counts on the 209 Report have been changed so that the report will honor the people counts entered by users (except for strike team components, where an entry of zero in the people count will still be replaced by the default values for those components)
4784	Incidents	• Incident numbers up to 10 digits are now accepted in e-ISuite.
5575	Help System	• The e-ISuite Help System has been reviewed and updated.
5565	Reference Data	• The Reference Data Tables have been reviewed and updated and the AD Rates for 2018 have been added.
