

e-ISuite 2.0.1 Patch 1 Release Notes

Date: July 3, 2020
Version: Apply to Site Version 2.0.1

Description:

The purpose of Patch 1 is to fix several defects discovered since last month's deployment. See list below for specific information.

Additional information is also available on the e-ISuite Webpage:

<https://famit.nwcg.gov/applications/eISuite>

Important Things to Know Prior to Installing e-ISuite Site 2.0.1 Patch 1

- Only apply this patch to e-ISuite Site Version 2.0.1 Production.
- Backup all databases before applying the patch.
- Close all browser windows and ensure there are no active connections to the e-ISuite Server.
- System Administrative privileges **are** required to install this patch. Users will need to use their agency protocol for installing software.
- The version number will not be updated with this patch. A message stating "(Patch 1 Applied)" will display on the Home Page near the System Version. This will be confirmation that the patch is installed.
- Google Chrome is the **only** supported browser.
- Users **must** clear their browser cache after installing e-ISuite Site 2.0.1 Patch 1. Instructions for clearing the browser cache in Chrome can be found here: [Clearing Chrome Browser Cache](#).

Steps for Installation

1. Download the Site 2.0.1 Patch 1 from the Site Download page on the e-ISuite Webpage: <https://famit.nwcg.gov/applications/eISuite/general/downloads>
2. Install the patch using your agency protocol for installing software.
3. Reboot your computer.
4. Clear your browser cache. See instructions above on clearing the browser cache in Google Chrome.
5. Log into e-ISuite Site.

On the Home Page next to System Version 2.0.1, verify the following appears: (Patch 1 Applied).

e-ISuite 2.0.1 Patch 1 Release Summary

	Functional Area	Summary
Defects fixed in Patch 1		
1	Cost	Aircraft daily cost screen will now accept a decimal in the Flight Hours, Water Gal, # Loads, Ret Gal and Lbs Cargo fields.
2	Custom Reports	When importing a custom report that was created in Version 1.2.6, the criteria statements will now import successfully.
3	Data Transfer	Carriage returns in the resource name and remarks field no longer cause an issue with data transfer.
4	Demob	The Demob Settings screen no longer appears jumbled and changes will save without a server exception error.
5	Demob	When using the Shift or CTRL keys, the system will now only print the crew parent record.
6	General	Reports will now generate without errors.
7	IAP	The Save button is now the first button in the list on the Master Frequency List screen.
8	IAP	The Function field can now be edited on the Master Frequency List screen without having to delete and re-enter the frequency.
9	Incidents	The FED option no longer appears in the Incident Jurisdiction list on the Incidents Screen.
10	Incidents	The Incidents screen can now be customized to hide incident groups. This applies only to the Enterprise System.
11	Time	The Post Time Only feature will no longer display hours in the quantity field.
12	Training Specialist	Priority Programs will now display without having to log out and back into the system.
13	Training Specialist	Priority Programs can now be deleted. This issue only occurred in the Enterprise System.
14	Training Specialist	Double-clicking the Trainee Assignment will no longer result in duplicate saved data.
