

**ICBS Business Release Notes
BR 1.5.2
04/17/2018**

BR 1.5.2 is scheduled to be deployed in production on 04/17/2018

Change Request/Bug Fixes

Below is the description of the change that is scheduled to be implemented in this release.

Scan gun

- 1. CR2733 - 'LPN RFI Returns' in ICBS Mobile Application**
RFI LPN Returns functionality being deployed on the ICBS mobile application. This option will be available separately from the RFI returns in the menu on the home screen of new Android scan guns. In the old Motorola scan guns creating RFI LPN Returns option was provided within RFI return menu.
RFI LPN Return functionality can be used only for RFI returns and only for non-trackable items.
- 2. CR2759 - User unable to log into Production or Training on the Scan Gun**
Users with usernames containing an apostrophe have been unable to log into the ICBS Android mobile scan guns.
This login issue is being fixed with the changes in this release.

Cognos

- 1. CR 2744 - NWCG Kit Contents Report anomaly**
The NWCG Kit Contents Report provides details of published kit item and its component. In one of the scenarios, where the kit item was unpublished, but its components were still published, this report was showing the unpublished kit details in the report also.
This issue has been fixed and now the report will only display published item details even when the kit item is unpublished and its components are published.
